Profile

A skilled Software developer with expertise in JavaScript, Next.js, React, and Laravel. I have worked across industries including **Logistics, Financial Services,** and **Technology,** delivering web applications that improve user experience and business performance.

I have experience leading development teams, mentoring junior developers, and collaborating with cross-functional teams to build scalable, high-performance solutions. My work includes improving application performance, integrating serverless APIs, and automating processes to increase efficiency.

I am passionate about continuously learning and keeping up with new technologies to stay ahead of industry trends. My goal is to deliver clean, maintainable code and user-friendly applications that drive growth and solve real-world problems.

Employment History

Senior Software Engineer, Fresh Market Xchange (FMX), Melbourne, Victoria, Australia

JULY 2024 — PRESENT

- Managed and led a team of three frontend developers, driving the successful delivery of high-quality projects from initial concept to final deployment.
- Developed key features for internal teams, increasing their productivity by approximately 25%.
- Mentored junior developers, fostering professional growth and enhancing overall team productivity.
- Collaborated with product and design teams to build and maintain features for various internal and external dashboards.
- Worked with QA Engineers to ensure new features/pages are tested and approved within 72 hours.
- Migrated client's existing React app to Next.js, leveraging server actions, server components, and serverless APIs, resulting in 56% performance improvement.
- Developed standard reports for all projects, making it easier for future developers to understand and build upon codebase.
- Enhanced and updated frontend functionalities across the web app.
- Delivered a responsive and high-performance interface tailored to wholesale market needs.
- Integrated multilingual support (Japanese and English) to improve accessibility.
- Implemented OCR technology to streamline order processing and automate invoice generation.
