- React Native
- Nextjs
- Nestjs

PROFESSIONAL SUMMARY

Software engineering professional with deep expertise in developing robust, scalable applications. Strong focus on team collaboration, driving projects to successful completion, and adapting to evolving requirements. Proficient in multiple programming languages, frameworks, and tools. Values delivering high-quality results and fostering productive work environment.

EXPERIENCE

January 2025 - Current
Myvamsnet Limited - Senior Software Engineer, Lagos, Nigeria (Remote)

- Lead the end-to-end technical vision, architecture, and execution of all clients products.
- Oversee both frontend and backend development using Next.js, NestJS, TypeScript, React Native/Expo, and Supabase.
- Migrated client mobile app from **Core React Native to Expo**, achieving **45% faster development speed** and improved overall performance.
- Drive engineering best practices and guide the adoption of modern, scalable technologies across all teams.
- Coordinate with cross-functional teams to translate business goals into high-performance software solutions.
- Ensure system reliability, performance optimization, and consistent delivery of new features.
- Build secure, scalable, and user-focused platforms that support long-term company growth.

July 2024
Fresh Market Xchange (FMX) - Senior Software Engineer, Melbourne, Victoria, Australia

- Managed and led a team of three frontend developers, driving the successful

delivery of high-quality projects from initial concept to final deployment.

- Developed key features for internal teams, increasing their productivity by approximately 25%.
- Mentored junior developers, fostering professional growth and enhancing overall team productivity.
- Collaborated with product and design teams to build and maintain features for various internal and external dashboards.
- Worked with QA Engineers to ensure new features/pages are tested and approved within 72 hours.
- Migrated client's existing React app to Next.js, leveraging server actions, server components, and serverless APIs, resulting in 56% performance improvement.
- Developed standard reports for all projects, making it easier for future developers to understand and build upon codebase.
- Enhanced and updated frontend functionalities across the web app.
- Delivered a responsive and high-performance interface tailored to wholesale market needs.
- Integrated multilingual support (Japanese and English) to improve accessibility.
- Implemented OCR technology to streamline order processing and automate invoice generation.

August 2022 - October 2024
Stellas Bank - Senior Software Engineer, Lagos, Nigeria

- Operating in an Agile and Scrum-oriented work environment, utilizing tools like Git, Jira, Slack, Microsoft Teams and other tools.
- Managing the Stellas Bank Frontend and Interstellas Frontend, making use of a diverse set of tools such as Typescript, Javascript, Reactjs, Nextjs, Redux, React Query, Cypress, Eslint, Prettier, and various additional packages.
- Collaborate with Back-end developers and Product Designers to improve usability.
- Get feedback from, and build solutions for, users and customers.
- Fixing web app issues or bugs that arise.
- Adding features to the Stellas Frontend and Interstellas Frontend web applications.
- Adding custom features with proper unit tests.
- Performed pair programming with other colleagues.
- Collaborated with the Customer Support team to resolve customer issues effectively.

March 2022 - December 2022
The GIG Group - Software Engineer, Lagos, Nigeria

- Designed and delivered scalable digital solutions to support logistics operations, focusing on user-friendly interfaces and seamless functionality.
- Migrated The GIG Group's primary logistics application from React to Next.js, achieving a 56% improvement in performance and scalability.
- Initially joined The GIG Group to enhance its logistics operations through innovative digital solutions and later transitioned to Stellas Bank, a subsidiary, to drive technology initiatives within the financial services sector.

May 2021 - June 2022

Mobinent - Full-stack Developer(React/Laravel), Hong Kong

- Working with clients to develop the overall look and design of a web app.
- Building web app using programming language such as HTML, CSS, JavaScript, Reactjs and Laravel (API).
- Producing, Maintaining, and Modifying web app and User interface.
- Collaborate with other team developer and UI UX designer to improve usability.
- Get feedback from and build solutions for users and customers.
- Routinely test web app for ease of use, speed and quality factors.
- Fixing web app issues or bugs that arise.
- Hong Kong

April 2020 - May 2021
Gheli Technology Solution limited - Software Engineer, Benin, Edo State, Nigeria

- Supported schools during the COVID-19 pandemic by developing robust online solutions to facilitate remote learning.
- Built a Computer-Based Test (CBT) platform and an online classroom system using PHP and Laravel.
- Collaborated with educators and administrators to understand requirements and deliver tailored solutions.
- Designed and implemented user-friendly interfaces to ensure accessibility for students and teachers.
- Debugged and optimized application performance to handle high traffic during peak usage times.
- Provided technical support and resolved issues promptly to ensure seamless operations.

November 2019 - October 2020
Ministry of innovation, science and technology - Assistant Software Engineer-NYSC, Osogbo, Osun State, Nigeria

- Assisted the Osun State Government in building a web application to track patients in isolation centers and provide real-time COVID-19 statistics.
- Developed a web application for the Ministry of Innovation, Science, and Technology, Osogbo, Osun State, to create COVID-19 awareness campaigns.
- Leveraged Laravel and React to build scalable, efficient, and user-friendly solutions.
- Collaborated with government officials to gather requirements and deliver impactful applications.
- Ensured high performance and reliability to support critical pandemic response efforts.
- Osogbo, Osun State

April 2018 - August 2019
Digital Crystal solution Tech - PHP/Laravel Developer, Edo State, Nigeria

- Ensuring web design is optimized for smartphones.
- Building reusable code for future use.
- Optimizing web pages for maximum speed and scalability.
- Utilizing dynamic scripting languages, such as PHP, to develop web pages.
- Ensuring brand consistency across designs by using Bootstrap CSS and PHP.
- Part Time
