

FELIX OLAWOLE OLATUBORA

Senior Software Engineer — Backend Architecture & Fintech Platforms

olatubora1996@gmail.com | 07086514426 | Lagos, Nigeria (Remote) | GitHub · LinkedIn · Portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years across fintech, healthtech, logistics, and e-commerce, currently building core wealth-management infrastructure at Afrinvest (West Africa) Limited. Specializes in backend architecture and system design — microservices, multi-tenant platforms, KYC/AML flows, and financial data integrity — using NestJS, Laravel, and Next.js, backed by strong PostgreSQL and distributed-systems fundamentals. Track record of measurable delivery: 35% faster transaction processing, 40% fewer API calls, and a 56% performance gain from a full framework migration. Experienced leading and mentoring engineering teams, and currently deepening expertise in Java/Spring Boot and data engineering/cloud infrastructure.

CORE SKILLS

- **Backend & Architecture:** NestJS, Node.js/Express, Laravel/PHP, microservices, platform federation, multi-tenant (schema-per-tenant) SaaS design, event-driven & queue-based systems (BullMQ, Redis)
- **Frontend & Mobile:** React, Next.js, React Native/Expo, TypeScript, TailwindCSS, Redux/React Query
- **Data & Infrastructure:** PostgreSQL (incl. PostGIS), Drizzle ORM, AWS, Vercel, Supabase, Hetzner/Coolify, CI/CD, Docker
- **Domain Expertise:** KYC/AML architecture, financial transaction integrity, double-entry ledger/wallet systems, real-time systems (WebSockets/Socket.io)
- **Practices:** Agile/Scrum, code review, technical mentorship, API design, Git, Jira

EXPERIENCE

Senior Software Engineer — Afrinvest (West Africa) Limited, Lagos, Nigeria (Remote)

June 2025 – Current

- Build and maintain core wealth technology platforms — Afrinvestor 2.0 and PlutusNeo — including KYC architecture, platform federation, and microservices design, serving 700,000+ active users across mobile and web with 99.9% uptime.
- Played a key role in developing and enhancing the FNG Bond product, improving transaction processing speed by 35% and reducing user-reported issues by 20%.
- Implemented advanced server-side caching, reducing API calls by 40% and cutting average page load time from 3.2s to 1.8s.
- Applied optimistic UI update strategies, cutting perceived wait time by over 50% and lifting task completion rates by 25%.
- Designed and launched a non-intrusive in-app feedback system achieving a 45% response rate, enabling data-driven product decisions.
- Developed and integrated secure RESTful APIs connecting frontend applications to core business systems, with authentication, authorization, and safe handling of financial transactions and user data.
- Optimized backend API performance through efficient queries, pagination, request validation, and response caching.

Senior Software Engineer — Myvamsnet Limited, Lagos, Nigeria (Remote)

October 2024 – June 2025

- Led the design of scalable systems, APIs, and backend services using NestJS, PostgreSQL, and Supabase.
- Built and maintained applications using Next.js, React Native, and Expo.
- Managed and mentored a cross-functional team of 5 engineers — code reviews, onboarding, and continuous skill development.
- Oversaw deployment workflows across AWS, Vercel, and Supabase Edge Functions.
- Authored standard technical reports across projects to improve codebase continuity for future developers.
- Worked directly with stakeholders to translate product ideas into technical solutions and iterative releases.

Senior Software Engineer — Stellas Bank, Lagos, Nigeria

August 2022 – October 2024

- Owned the Stellas Bank and Interstellas frontend applications using TypeScript, React, Next.js, Redux, React Query, and Cypress in an Agile/Scrum environment.
- Collaborated with backend engineers and product designers to improve usability and ship new features with full unit-test coverage.

- Partnered with the Customer Support team to diagnose and resolve customer-reported issues, and performed regular pair programming with colleagues.
- Transitioned from The GIG Group into Stellas Bank, its financial-services subsidiary, to help drive its technology initiatives.

Software Engineer — The GIG Group, Lagos, Nigeria

March 2022 – December 2022

- Designed and delivered scalable digital solutions for logistics operations, focused on usability and reliability.
- Migrated the company's primary logistics application from React to Next.js, achieving a 56% improvement in performance and scalability.

Full-Stack Developer (React/Laravel) — Mobinent, Hong Kong

May 2021 – June 2022

- Partnered directly with clients on web application design and scope, building with HTML, CSS, JavaScript, React, and Laravel APIs.
- Produced, maintained, and modified applications and UI in collaboration with developers and UI/UX designers.
- Ran regular usability, speed, and quality testing, and resolved bugs raised through client and user feedback.

Software Engineer — Gheli Technology Solution Limited, Benin, Edo State, Nigeria

April 2020 – May 2021

- Built a Computer-Based Test (CBT) platform and an online classroom system using PHP and Laravel to support remote learning during COVID-19.
- Worked with educators and administrators to scope requirements and deliver accessible, user-friendly interfaces for students and teachers.
- Debugged and optimized application performance to handle high traffic during peak usage periods.

Assistant Software Engineer (NYSC) — Ministry of Innovation, Science and Technology, Osogbo, Osun State, Nigeria

November 2019 – October 2020

- Built a web application for the Osun State Government to track patients in isolation centers and report real-time COVID-19 statistics.
- Developed a public awareness campaign application for the Ministry using Laravel and React, working directly with government officials on requirements.

PHP/Laravel Developer — Digital Crystal Solution Tech, Edo State, Nigeria

April 2018 – August 2019 · Part-time

- Built and maintained PHP/Laravel web pages with Bootstrap CSS, focused on mobile optimization, reusable components, and page-speed performance.

EDUCATION

- **Higher National Diploma (HND)** — Edo State Polytechnic, Usen, Edo State — August 2019
- **BSc, Software Engineering (In View)** — Miva Open University — Expected 2027
