- Nestjs

PROFESSIONAL SUMMARY

Dynamic software engineering professional with extensive experience in designing and implementing robust, scalable applications. Strong commitment to team collaboration and excels in driving projects to successful completion while adapting to evolving requirements. Proficient in diverse programming languages, frameworks, and tools, ensuring the delivery of high-quality results. Passionate about fostering a productive work environment that encourages innovation and continuous improvement.

EXPERIENCE

June 2025 - Current

Afrinvest (West Africa) Limited - Senior Software Engineer, Lagos, Nigeria
(Remote)

- Successfully delivered application development for Afrinvestor, the official digital investment platform of Afrinvest, serving 700,000+ active users across mobile and web platforms while maintaining 99.9% uptime and high transaction reliability.
- Played a key role in the development and enhancement of the FNG Bond product, improving transaction processing speed by 35% and reducing user-reported issues by 20%.
- Implemented advanced caching mechanisms using server components, reducing API calls by 40% and improving average page load time from 3.2s to 1.8s.
- Applied optimistic UI update strategies, decreasing perceived user wait time by over 50% and improving task completion rates by 25%.
- Designed and launched a non-intrusive in-app feedback system, achieving a 45% response rate and enabling data-driven product improvements based on structured user satisfaction metrics.
- Developed and integrated secure RESTful APIs with backend services, ensuring reliable communication between frontend applications and core

business systems.

- Optimized backend API performance through efficient database queries, pagination, request validation, and response caching, improving overall system responsiveness and scalability.
- Collaborated with backend engineers to design scalable API contracts, implement authentication and authorization, and ensure secure handling of financial transactions and user data.
- Built and maintained backend services using NestJS and PostgreSQL, implementing modular architecture, robust error handling, and comprehensive input validation to improve maintainability and system reliability.
- Participated in backend architecture discussions, code reviews, and deployment processes, contributing to high availability, production stability, and seamless feature releases.

October 2024 - June 2025

Myvamsnet Limited - Senior Software Engineer, Lagos, Nigeria (Remote)

- Lead the design of scalable systems, APIs, and backend services using NestJS, PostgreSQL, and Supabase.
- Build and maintain robust applications using Next.js, React Native, and Expo.
- Manage and mentor a cross-functional team of 5 engineers, conducting code reviews, onboarding, and continuous skill development.
- Oversee deployment workflows with AWS, Vercel, and Supabase Edge Functions.
- Developed standard reports for all projects, making it easier for future developers to understand and build upon codebase.
- Work closely with stakeholders to translate product ideas into technical solutions and iterative releases.

August 2022 - October 2024

Stellas Bank - Senior Software Engineer, Lagos, Nigeria

- Operating in an Agile and Scrum-oriented work environment, utilizing tools like Git, Jira, Slack, Microsoft Teams and other tools.
- Managing the Stellas Bank Frontend and Interstellas Frontend, making use of a diverse set of tools such as Typescript, Javascript, Reactjs, Nextjs, Redux, React Query, Cypress, ESLint, Prettier, and various additional packages.
- Collaborate with Back-end developers and Product Designers to improve usability.
- Get feedback from, and build solutions for, users and customers.
- Fixing web app issues or bugs that arise.
- Adding features to the Stellas Frontend and Interstellas Frontend web applications.
- Adding custom features with proper unit tests.
- Performed pair programming with other colleagues.
- Collaborated with the Customer Support team to resolve customer issues effectively.

March 2022 - December 2022

The GIG Group - Software Engineer, Lagos, Nigeria

- Designed and delivered scalable digital solutions to support logistics operations, focusing on user-friendly interfaces and seamless functionality.

- Migrated The GIG Group's primary logistics application from React to Next.js, achieving a 56% improvement in performance and scalability.
- Initially joined The GIG Group to enhance its logistics operations through innovative digital solutions and later transitioned to Stellas Bank, a subsidiary, to drive technology initiatives within the financial services sector.

May 2021 - June 2022

Mobinent - Full-stack Developer(React/Laravel), Hong Kong

- Working with clients to develop the overall look and design of a web app.
- Building web app using programming language such as HTML, CSS, JavaScript, Reactjs and Laravel (API).
- Producing, Maintaining, and Modifying web app and User interface.
- Collaborate with other team developer and UI UX designer to improve usability.
- Get feedback from and build solutions for users and customers.
- Routinely test web app for ease of use, speed and quality factors.
- Fixing web app issues or bugs that arise.
- Hong Kong

April 2020 - May 2021

Gheli Technology Solution limited - Software Engineer, Benin, Edo State, Nigeria

- Supported schools during the COVID-19 pandemic by developing robust online solutions to facilitate remote learning.
- Built a Computer-Based Test (CBT) platform and an online classroom system using PHP and Laravel.
- Collaborated with educators and administrators to understand requirements and deliver tailored solutions.
- Designed and implemented user-friendly interfaces to ensure accessibility for students and teachers.
- Debugged and optimized application performance to handle high traffic during peak usage times.
- Provided technical support and resolved issues promptly to ensure seamless operations.

November 2019 - October 2020

Ministry of innovation, science and technology - Assistant Software Engineer-NYSC, Osogbo, Osun State, Nigeria

- Assisted the Osun State Government in building a web application to track patients in isolation centers and provide real-time COVID-19 statistics.
- Developed a web application for the Ministry of Innovation, Science, and Technology, Osogbo, Osun State, to create COVID-19 awareness campaigns.
- Leveraged Laravel and React to build scalable, efficient, and user-friendly solutions.
- Collaborated with government officials to gather requirements and deliver impactful applications.
- Ensured high performance and reliability to support critical pandemic response efforts.
- Osogbo, Osun State

April 2018 - August 2019

Digital Crystal solution Tech - PHP/Laravel Developer, Edo State, Nigeria

- Ensuring web design is optimized for smartphones.

- Building reusable code for future use.
- Optimizing web pages for maximum speed and scalability.
- Utilizing dynamic scripting languages, such as PHP, to develop web pages.
- Ensuring brand consistency across designs by using Bootstrap CSS and PHP.
- Part Time
